Election Omnibus Findings
January 2021
Methodology

• Lake Research Partners and The Tarrance Group designed and administered this pre-election and election night survey which was conducted using professional interviewers from October 31 – November 3, 2020. The questions about voting and the demographics reached a total of 2,400 voters nationwide who voted in the 2020 elections or who were planning to vote later on Tuesday – 1,335 interviews among voters who were reached on cell phones, including 600 interviews completed by text-to-online, and 1,065 interviews among voters who were reached on landlines (margin of error +/- 2.0%). Issue questions reached a total of 1,200 voters nationwide who voted in the 2020 elections or who were planning to vote later on Tuesday (margin of error of +/-2.8%).

• Telephone numbers were drawn from the TargetSmart voter file. The sample was stratified geographically based on the proportion of likely voters in each region. The data were weighted to reflect the aggregated Presidential vote as reported in the 2020 exit polls, as well as by gender, age, race, party identification, education, marital status, union household, and census region to reflect the actual proportions of the electorate.

• Due to rounding some of the numbers in the presentation will not always add to 100%.
More than 2 in 5 voters report having a disability and/or having a family member or a close friend with a disability. Throughout this webinar deck, we use either the phrase “voters with disabilities/family/friends” or “P/F/F” to refer to the total sample of voters who say they either personally have a disability, have a family member with a disability, or a close friend with a disability.

Do you, a family member, or a close friend have a disability, such as a physical, mental health, sensory, learning, cognitive or other disability that impacts daily living? If yes, then please let me know which applies.

A majority of voters with disabilities overall, including 55% of voters with disabilities in battleground states, voted for Donald Trump. A majority of the voters with disabilities/family/friends voted for Biden – 51% to 48%. In 2016, a plurality of voters with disabilities (49%) voted for Clinton.

If the election for President were held today, and the candidates were Democrat Joe Biden, Republican Donald Trump, Libertarian Jo Jorgensen, and Green Party Candidate Howie Hawkins, for whom would you vote?

Voters with disabilities nationwide split their votes evenly between the Democratic and Republican candidate. Among voters with disabilities in battleground states, 52% voted for the Republican candidate. Half of all voters with disabilities/family/friends voted for the Democrat.

In the election for Congress, will you vote for [ROTATE: _the Republican candidate or _the Democratic candidate? [IF “UNDECIDED,” ASK]: Which candidate do you lean toward at this time?

Among voters with disabilities and those connected to voters with disabilities, COVID-19 and the economy and jobs were the most important issues in deciding for whom to vote. Voters with a family member or close friend were likely to list health care as an important issue and voters with disabilities were more likely than voters overall to list Social Security and Medicare as an important issue, too.

I am going to read you a list of issues that may have come up during the election. Please tell me which one or two of these was most important to you in deciding from whom to vote. [TOP TIER]

- The economy and jobs: 22% (Total PWD/Friends/Family), 26% (Voters with Disabilities), 28% (Family Member), 30% (Close Friend)
- COVID-19: 15% (Total PWD/Friends/Family), 19% (Voters with Disabilities), 21% (Family Member), 24% (Close Friend)
- Health care: 13% (Total PWD/Friends/Family), 14% (Voters with Disabilities), 17% (Family Member), 18% (Close Friend)
- Dysfunction in government: 12% (Total PWD/Friends/Family), 14% (Voters with Disabilities), 20% (Family Member), 24% (Close Friend)
- Racial justice: 9% (Total PWD/Friends/Family), 10% (Voters with Disabilities), 13% (Family Member), 17% (Close Friend)
- Social Security and Medicare: 9% (Total PWD/Friends/Family), 10% (Voters with Disabilities), 13% (Family Member), 17% (Close Friend)
- The environment and climate change: 7% (Total PWD/Friends/Family), 9% (Voters with Disabilities), 10% (Family Member), 10% (Close Friend)
- Taxes: 3% (Total PWD/Friends/Family), 6% (Voters with Disabilities), 9% (Family Member), 10% (Close Friend)
- Terrorism/National Security: 6% (Total PWD/Friends/Family), 9% (Voters with Disabilities), 10% (Family Member), 10% (Close Friend)
- Immigration: 3% (Total PWD/Friends/Family), 9% (Voters with Disabilities), 9% (Family Member), 12% (Close Friend)
Candidates and Disability Issues
Less than one-third of voters overall remember hearing, reading, or seeing anything from congressional or presidential campaigns about issues that are important to people with disabilities. African American voters are most likely to recall hearing something from campaigns. Independents and voters in the Midwest are least likely.

Among those who heard, read, or saw something, 53% voted for Biden and 46% voted for Trump. Those who heard, read, or saw something voted 53% for the Democratic candidate and 46% for the Republican candidate on the congressional ballot.
Voters with disabilities, particularly women with disabilities, and voters with a close friend with disabilities are most likely to have heard, read, or seen something.

Leading up to the November 2020 General Election, did you hear, read, or see anything from congressional or presidential campaigns about issues that are important to people with disabilities?

At least 9 in 10 voters agree that our communities are at their best when all people, including people with disabilities, have opportunities, and that people with disabilities should be at decision making tables just like everyone else. Voters also strongly agree with statements that call for disability issues to be included in national policies and for candidates and their campaigns to include this constituency in their efforts and fight against stigmas and bias.

Now let me read you some statements and please tell me if you agree or disagree with each statement. [TIER ONE]

<table>
<thead>
<tr>
<th>Statement</th>
<th>All Voters</th>

<td>70 (Strongly agree) / 87 (Not so strongly agree)</td>
</tr>
<tr>
<td>America’s leaders should fight stigmas and bias that limit opportunities for people with disabilities.</td>
<td>70 (Strongly agree) / 86 (Not so strongly agree)</td>
</tr>
</tbody>
</table>
At least two-thirds of voters also strongly agree with statements that center people with disabilities and highlight their contributions to the workplace, underscore the historical biases they have faced, and talk about how voting on issues important to this community can bring about change. Statements focused on the individual around the issues and motivation to vote fall into a second tier. Voters are more likely to strongly agree that issues around disability and healthcare influence their motivation to vote rather than disability issues alone.

Now let me read you some statements and please tell me if you agree or disagree with each statement. [TIER TWO]

<table>
